The range of hair replacement

# Hairpieces to suit your image

“Our mission: to supply a hairpiece solution to suit everyone’s image”

Cornelia Hoffmeister  
Managing Director gfh

## How do I achieve perfect results?

### 1 | Personal consultation with the customer

Don't rush things. Create a relaxed atmosphere. Encourage the customer to talk. Find out what his requirements and ideas are. What is his professional occupation? What sort of hobbies does he have? What is important to him? How far away from your salon does he live? Is he mobile? How well off do you consider him to be? How do you assess his financial options?

The answers to these questions will serve as pointers for further advice.

### 2 | When do I recommend synthetic fibres (sensohair®)?

Is easy hair care important to the customer? Does he find using a

brush and hairdryer difficult? Would he like to remove his hair replacement system at night and reattach it in the morning quickly and easily after showering? Can he come regularly to your hair studio, or not? Is his scalp easily irritated or does it suffer from dandruff?

If the answer to these questions is “yes”, then hairpieces made of sensohair® (synthetic fibres) with clips and/or adhesive tape technology are advised for use at home.

### 3 | What is the advantage of having human hair?

Would the customer like the greatest possible natural look and the feeling of having “real” hair? Would he like to blowdry and style his

hairpiece as if it were his own hair? Does he wish to be able to wear it in bed and is he prepared to spend a little more for it?

In this case, you can recommend TOP SECRET® human hair systems.

### 4 | When do I introduce European hair?

If the customer would explicitly like a human hair system and has particular requirements such as his hair needs to suit his own fine hair structure exactly, shine and natural appearance should be undiminished even after several months. If he has striking light grey or light blond hair and is looking for “only the best”, then the obvious choice is to use European hair and the individually custom-made TOP SECRET® system.

## Training in cutting and large selection included

The Advice Centre in Fürth supports hairpiece specialists with advice and tips

### 5 | When do I advise customers to have detachable systems?

These are for customers looking for an inexpensive solution, who want to wear their system for as long as possible, who have scalp problems and who prefer to wear synthetic hair rather than human hair.

### 6 | To which customers should I recommend permanent systems?

These are for customers who are looking for a hair system which will be secure in any situation – almost day and night – those who reject the feeling of a “replacement”, who are willing to come for a hair service every four weeks, do not have any scalp problems and do not want to be troubled with adhesive strips, etc.

### 7 | When do I recommend foil systems?

Foil systems are currently the “highest level of technology” for customers with a healthy scalp, who value define naturalness, transparency and a completely “secret” solution. These are attached

completely securely using durable adhesive strips (when at home) or the bonding process (salon service).

### 8 | To whom should I offer custom made systems?

As versatile as the standard range is, it cannot always offer an immediate solution for every size of bald patch, every shape of head, every nuance of colour and every hair length. For a professional, it should go without saying, to provide a system individually custom made (mold) to the best fitting and to match his style.

PS: Hair systems made of European hair are only available as custom-made items!

### 9 | The way to successful hair replacement consultations

You will learn all about attachment systems, cast methods, hair care, technology, cut, etc. in our GFH seminars and workshops in Fürth. We train you in effective small groups. Contact us!

TOP SECRET®

# HAIRPIECES

Standard stock items in sensohair®

## Simply practical and flexible

Our hair replacements in stock offer you a wide choice of colours and models in human hair and in sensohair®. You can order all models at GFH to look at, without obligation to buy.

sensohair® is a modacrylic synthetic fibre which has enjoyed great popularity on the toupee market for decades. It is extremely easy to care for, keeps its shape and is relatively colourfast. It can be reshaped using special steam devices and curling tongs. However it does not tolerate dry heat over 70°C.

The SILK MONO model has been developed following requests by hairpiece users for a naturally light structure and moderate hair thickness.

## SILK MONO

**Specifications:** The new Silk-Mono-base-construction is silky soft and pleasant to the skin. It combines the insights and requests of many hairpiece-wearers for a naturally light base and moderate hair thickness. A 4cm-wide fine PU front with a rippled edge guarantees an invisible hairline without shadows. The PU edge which is approximately 8 cm wide over the back of the head lends stability to the hairpiece without adding bulk.

**Practical:** If required the entire PU area can be reduced accordingly and be cut to size!

**Size:** 23cm x17cm (LxW)

**Hair quality:** sensohair®

**Hairstyle:**

freestyle = without parting

**Hair length:** 5-8 cm

**Knotting density:** light (= 80%)

**Fine implantation:**

1-2 hairs per knot

**Waves:** slight (= 35 mm)

**Colours:** available in all colours in the gfh-3-tone-colour ring

**Method of attachment:**

Adhesive tapes/strips, clips

## FREESTYLE A/B

**Specifications:** A fine pore mono-filament lends transparency and durability to this reliable toupee. Thanks to the special "super front" it is ideal for "free" hairstyles. The relatively dense volume of hair is excellently suited to flat-top hairstyles. All-round PU edge for secure attachment.

This model has been a popular choice for decades.

**Size:** Version A: 22cm x16cm

Version B: 24cm x18cm

**Hair quality:** sensohair®

**Hairstyle:**

Freestyle = without parting

**Hair length:** 6-11 cm

**Knotting density:** medium (= 100%)

**Fine implantation:**

1-2 hairs per knot

**Waves:** slight (= 30 mm)

**Colours:** available in all colours in the gfh-3-tone-colour ring

**Method of attachment:**

Adhesive tapes/strips, clips

## SUPER PRIMO

**Specifications:** The base material is a large-pore, air-permeable nylon weave. Light, transparent and yet very robust. A very good all-round hairpiece for traditional hairstyles with partings. Particularly suitable for customers who prefer breathable and yet durable toupees. PU edge all around for secure attachment.

**Size:** 24 x 18 cm

**Hair quality:** sensohair®

**Hairstyle:** off-centre parting left

**Hair length:** 7-12 cm

**Knotting density:** medium-light (= 90%)

**Waves:** slight (= 35 mm)

**Colours:** available in all colours in the gfh-3-tone-colour ring

**Method of attachment:**

Adhesive tapes/strips, clips

TOP SECRET®

# HAIRPIECES for men

Standard range in human hair

## Really natural, real quality

Only the highest quality human hair is used in all TOP SECRET® human hair hairpieces. Stock pieces are produced in Indian hair from which the cuticles are removed in a special process to prevent dangling.

TOP SECRET® human hair models can be treated like natural hair: you can wear them night and day, wash them in warm water, blowdry and have perms, etc.

The ultra-violet rays of the sun affect the colour – just as they do natural hair: black and brown colours become slightly reddish, grey might become yellow and blonde hair turns 2-3 shades lighter. This is unavoidable. Nevertheless, because it is human hair, you can take measures against this effect using colour rinses, tints, etc. The gfh team will be pleased to advise you further.

Real European hair is also available for special finishes. This is distinguished by its structure, colour luminosity and naturalness. This is hair replacement in highest standard for special requirements.

Fine and flexible without irritating edges or reinforcements:  
LIBERTY fits exactly to the shape of each individual's head.

## NEW NATURAL

**Specifications:** The NEW NATURAL human hair hairpiece has a fine monobase which is edged all around with a thin PU edge. Hair volume and hair movement follow nature's pattern. Thanks to the thin PU edge there is no extra bulk, and a variety of hairstyle options are available.

**Practical:** If required the entire PU area the hairpiece can be reduced and be cut to size.

**Size:** 24 x 18 cm

**Hair quality:** Real hair (Indian)

**Hairstyle:** Centre whorl

**Hair length:** 8-12 cm

**Knotting density:** medium (= 100%)

**Fine implantation:**

1-2 hairs per knot

**Waves:** 35 mm

(slightly naturally wavy)

**Colours:** available in all colours in the gfh- 3-tone-colour ring

**Method of attachment:**

All adhesive strips, edge bonding

## LIBERTY

**Specifications:** A new generation of toupees has been launched: A fully transparent, breathable "lace" net was chosen for the base. LIBERTY nestles against the shape of the head; it is fine and flexible without irritating edges or reinforcements. The knot ties are bleached at the hairline for all dark and brown colours. This means that hair can be styled any which way – even backwards. LIBERTY can be altered to any base size as required.

**NEW:** for a small fee we will re-sew the edge for you and also attach clips to it.

**Size:** 25 x 19 cm

**Hair quality:** Real hair (Asian)

**Hairstyle:** Centre whorl

**Hair length:** 12-15 cm

**Knotting density:** medium-light (= 80%)

**Waves:** slight (= 35 mm)

**Colours:** available in all colours in the gfh-3-tone-colour ring

**Method of attachment:**

Edge bonding, clips, adhesive tapes, micropoint procedure

## DERMATEC SOFT

**Specifications:** Offers a high level of comfort and permeability of air. The double-layer lace front is transparent and yet durable.

**NEW:** a stable 2-cm wide PU edge ensures adhesive fixing from temple to temple over the back of the head.

**Size:** 23.5 x 17 cm

**Hair quality:** Real hair (Indian)

**Hairstyle:**

Freestyle (without parting)

**Hair length:** 8-12 cm

**Knotting density:** medium-light (= 80%)

**Waves:** slight (35 mm)

**Colours:** available in all colours in the gfh-3-tone-colour ring

**Method of attachment:**

Edge bonding, adhesive tapes, clips, micropoint procedure, weaving

TOP SECRET®

## FOIL TOUPEES

Standard / Custom-made design

## Unbeatably transparent and secure

The demand for foil toupees has risen sharply in the past 10 years. The reason for this is undoubtedly because of its unbeatable transparency, i.e. human hair is implanted by hand in an almost transparent membrane in various ways. The result: astounding natural looks even from close up.

Foil toupees usually use liquid adhesive over the entire surface (= bonding procedure). This means they are very secure and allow customers to participate in unlimited sporting activities. Customers visit the specialist salon approx. every 4 weeks for a maintenance visit.

In our separate catalogue, you will find a variety of medically approved long-term adhesives for professional use and for customer use at home.

## AQUA

## Standard ready-made range

**Specifications:** A high quality, fine foil toupee. The thin PU foil is pleasant to the touch and fits almost every head shape automatically. It can be cut to size as required. The hair is injected into the foil without knots (V-loop) on the front hairline. This guarantees an absolutely natural look. The remaining hair is anchored with the finest tied knots into the foil.

**Size:** 24 x 18 cm

**Hair quality:** Real hair (Indian)

**Hairstyle:** Centre whorl

**Hair length:** 10-15 cm

**Knotted density:** medium (100%)

**Durability:** 4-5 months according to demand

**Waves:** slight, 35 mm

**Colours:** available in all colours in the gfh-3-tone-colour ring

**Fixing options:**  
all adhesive methods

Real hair

**SKIN LITE****Custom-made design**

**Specifications:** This model combines the requirement for naturalness with that of durability. Due to its silk reinforced PU base, the hair can be knotted into the foil in the best way possible. Even European hair, which otherwise does not stay in foil toupees can also be used!

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian, Chinese, European), sensohair®

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to a max of 120%

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 5-8 months according to demand

**Fixing options:**

all adhesive methods

**ROYAL SKIN - new!****Custom-made design**

**Specifications:** A membrane almost like your skin but as soft as a feather is something everyone likes! A truly "regal" model! The human hair is anchored into the special hair base with the smallest knots possible. This particular model is distinguished by being transparent and looking natural.

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian), sensohair®

**Hairstyle:** any

**Hair length:** max. 15 cm

**Knotting density:** up to a max of 100%

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 4-6 months according to demand

**Fixing options:**

all adhesive methods

**HI-TEC****Custom-made design**

**Specifications:** In this model each hair is implanted individually by hand into a thin PU foil. This gives the impression of the hair growing directly from the scalp: no knots and no loops. The way the hair moves also corresponds to natural hair growth. This means that it is possible to have any hairstyle. Even people close by cannot detect anything other than hair.

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian, Chinese)

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to a max of 120%

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 2-4 months according to demand

TOP SECRET®

## HAIR PIECES

Custom-made design

There is always  
a solution

Just like a made-to-measure suit, which fits like a glove and is tailored to the customer's requirements, hairpieces are also modelled individually by hand with precise attention to detail. The advantages over a ready-made piece are obvious: you get an accurate fit which takes into account the particular contours of your head; you can specify certain requirements regarding hair length, hair quality, volume, hair colour, points of adhesion, hairstyle, etc.

Caps and hair can even be inspected in advance and then approved for manufacturing.

You will need a mold of your customer's head for custom-made designs, possibly a hair sample, and an order form. Newcomers learn everything they need to know about ordering in the relevant toupee seminars. We are happy to advise you!

## CAP 220

## Custom-made design

**Specifications:** a good choice for anyone looking for a light, air-permeable model suitable for adhesives. The fine PU edge surrounds the thin monofilament weave and is not bulky. The front is made of "Swiss lace" which forms an invisible finish with no hard edges.

Tip: you should order this model in 100% = medium density

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian, European, Indian), sensohair®

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to a max of 100%

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 6-12 months according to demand

**Fixing options:**

adhesive tapes, edge bonding, clips

Real hair / sensohair®

**CAP 380****Custom-made design**

**Specifications:** A proven combination of net (approx. 2 x 2 mm), mono-filament and PU. It can be worn with clips or as a traditional hair weaving piece and offers the customer a high level of wearing comfort. The net piece at the rear of the head allows water and shampoo suds to run off. The edge is robust and yet soft. Any adhesives may be used in the front area if required.

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian, European, Indian), sensohair®

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to max. 150% (= very dense)

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 6-12 months according to demand

**Fixing options:**

weaving, clips, micropoint

**CAP 330****Custom-made design**

**Specifications:** An ideal solution for customers whose bald patches are not too noticeable as they still have some hair. The CAP 330 offers an entirely natural concentration of volume. The individual hair can be pulled through the openings in the knotted mesh. The edge is reinforced with a thin band and is therefore very suitable for weaving techniques. The front can be fixed using adhesive strips on the fine PU.

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian, European, Indian), sensohair®

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to a max of 120%

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 6-12 months according to demand

**Fixing options:**

weaving, clips, micropoint

**CAP 320****Custom-made design**

**Specifications:** A large-pore, hard-wearing polyester net characterises the CAP 320 model. It is robust and yet skin-friendly. With its whip-stitched edge, it is reliable, stable and suitable for fans of weaving models. Water and shampoo suds can be easily rinsed out. The adhesive strips are welded on firmly and are therefore long lasting.

**Size:** according to measurement/cast

**Selection of hair quality:**

Real hair (Indian, European, Indian), sensohair®

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to a max of 150%

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 8-12 months according to demand

**Fixing options:**

weaving, micropoint, clips

TOP SECRET®

## WIGS

Complete solutions in the standard range

### Hair colours: the 3-tone system for hairpieces and wigs

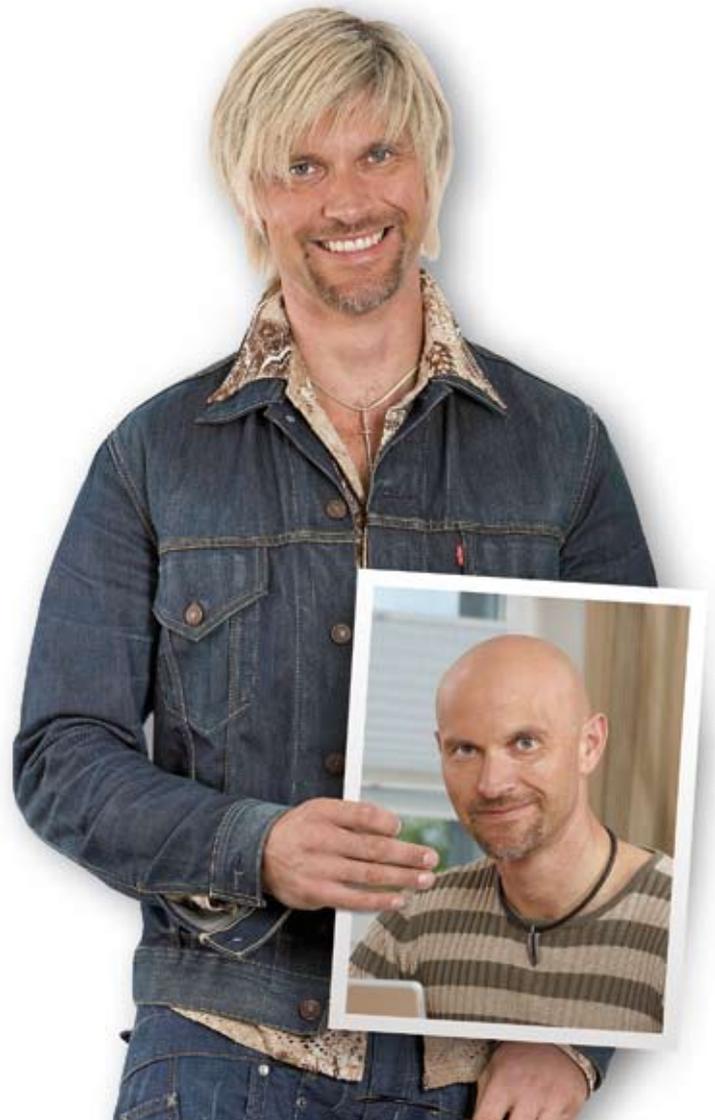

The 3-tone system reflects the natural colour gradients of human hair. This means that for natural tones there is a gradual visible lightening of 1-2 shades from the back of the head to the front hairline, while for grey tones there is a shading of the grey parts (e.g. the temples/side areas have the highest percentage of grey).

For all TOP SECRET® colour numbers on the colour ring you will find 3 swatches (I,II,III) per colour number. You can see the distribution of colours in the sketches on page 13.

## MEDILUXX

### Standard ready-made range

**Specifications:** A hand-knotted wig model with a large mono surface insert. The "lace" net hairline on the front edge ensures a soft, natural look. The density and length of the hair are already determined to match a natural look. A stretch insert and an elastic band ensure a comfortable, perfect fit. Sewn-in strands of hair in the nape of the neck ensure an optimal flat fit. Adhesives can be applied to the hairline and at the neck.

**Size:** 57 cm head circumference

**Choice of hair quality:** sensohair®

**Hairstyle:** Freestyle (without parting)

**Hair length:** 4-5 cm

**Knoting density:** medium (= 100%)

**Waves:** slight (35 mm)

**Colours:** available in all almost all the colours in the gfh-3-tone-colour ring

Head circumference 57 cm

## MEDIMAN STRETCH

### Standard ready-made range

**Specifications:** A particularly high-quality and luxuriously manufactured model with excellent wearability. The base is made entirely of silk mono and is therefore particularly delicate and soft on the scalp. The lace net hairline guarantees that it looks natural even from close up. Fine, non-bulky adhesive points give a firm hold and security. The 1-2 hair knotting technique lends this model the natural lightness required.

**Size:** 57 cm head circumference

**Choice of hair quality:**

Real hair (Indian)

**Hairstyle:** Freestyle (without parting)

**Hair length:** 4-5 cm

**Knoting density:** medium-light (= 90%)

**Waves:** slight (35 mm)

**Colours:** available in all almost all the colours in the gfh-3-tone-colour ring

Head circumference 57 cm

## WIGS

Complete solutions  
in custom-made designs

## 100% unique

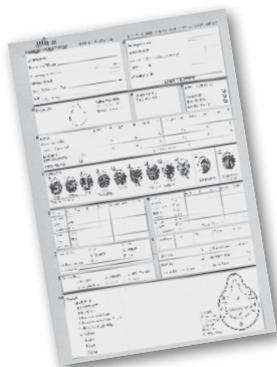

In the case of wigs, a perfect secure fit is particularly important. There are two options available for individual requests, head shapes, etc:

- a) you make a mold of the customer's head – preferably with the AQUACAST method.
- b) you request GFH to supply ready-made caps to try on. These are available in different sizes and designs.

Tip: we can also produce most models in top quality European hair.

The average delivery time for made-to-measure work is 8 – 10 weeks.

Use our special order form!

Information sheet: AQUACAST step by step to achieve a perfect head cast.

## HAIR MED MEN 1

## Custom-made design

**Specifications:** HAIR MED MEN 1 is a full lace wig. This is the new generation of wigs which have been seen on film stars in America and have been adapted for daily use. Lace wigs are made without rigid edge contours and are attached to the scalp with special adhesives. The lace material cannot be seen with the naked eye even from close up. It looks unbelievably "real" from the front, temples and sides.

**Size:** according to cast

**Choice of hair quality:** Real hair (Indian, European, Chinese)

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to max. medium/dense (= 110%)

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 4-6 months according to demand

**Fixing options:** all adhesive methods

Real hair

**HAIR MED MEN 2****Custom-made design**

**Specifications:** The feature of this hand-knotted wig is in the "French top". This is a double-layered lace in which the knots are anchored in the lower invisible layer. This gives the impression that the hair is growing directly from the scalp. Simply amazing! A lace front provides a soft hairline. The elastic material at the back of the head is soft and provides an excellent fit.

**Size:** according to cast

**Choice of hair quality:** Real hair (Indian, European, Chinese)

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to max. dense (= 130%)

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 6-12 months according to demand

**Fixing options:** adhesive strips

**AQUA komplett****Custom-made design**

**Specifications:** This foil model on a PU basis is particularly favoured by alopecia patients: it fits like a second skin to the shape of the head, is not bulky and does not feel like a wig as it does not have hooks, loops, reinforcements, etc. On request, very tiny ventilation holes can be punched into the foil to allow air to reach the scalp more effectively. The hair is "punched" into the front hairline, in other areas it is knotted in.

**Size:** according to cast

**Choice of hair quality:** Real hair (Indian, Chinese)

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to max. medium (= 100%)

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 3-6 months according to demand

**Fixing options:** all adhesive methods

**SKIN LITE complete****Custom-made design**

**Specifications:** A foil-base wig incorporating a paper-thin silk gauze. This reinforces the foil which has an advantageous effect on durability without being visible. The knots can be anchored more effectively due to the silk gauze and even European hair can be used. It can also be supplied with tiny ventilation holes.

**Size:** according to cast

**Choice of hair quality:** Real hair (Indian, European, Chinese,)

**Hairstyle:** any

**Hair length:** any

**Knotting density:** up to max. dense (= 120%)

**Waves:** any

**Colours:** according to gfh-3-tone-colour ring or hair test

**Durability:** 4-9 months according to demand

**Fixing options:** all adhesive methods
